1. Auth API

#	Function	URL	Method	Fields
1	Signup	http://54.164.83.129:8555/ api/account/signup	POST	Postdata : username, name, password, email, mobile
2	Login	http://54.164.83.129:8555/ api/account/token-auth	POST	Postdata : username, password
3	Logout	http://54.164.83.129:8555/ api/account/logout	DELETE	Header: X-Auth-Token:<token>

2. Social Auth API

#	Function	URL	Method	Fields
1	Signup	http://54.164.83.129:8555/ api/account/social/signup	POST	Postdata : name, email, mobile, social_id, token, provider
2	Login	http://54.164.83.129:8555/ api/account/social/token-au th	POST	Postdata : social_id, token, provider(eg: facebook)

3. Company API

#	Function	URL	Method	Fields
1	create /edit	http://54.164.83.129:8555/ api/profile	POST	Postdata : company_name, designation, membership_number, trade_license_number, company_email, image (optional) Header : X-Auth-Token:<token>
2	View	http://54.164.83.129:8555/ api/profile	GET	Header : X-Auth-Token:<token>
3	Set Region	http://54.164.83.129:8555/ api/profile/set-region	POST	Postdata: region_id (integer) (available IDs are: 1(Middle East), 2(Africa), 3(CIS), 4(Indian Subcontinent), 5(Asia), 6(Australia), 7(North America), 8(South America). Header : X-Auth-Token:<token>

4. Business Matching API

#	Function	URL	Method	Fields
1	Set details	http://54.164.83.129:8555/ api/business-matching	POST	Postdata : provides(products/services/both) employee_count, annual_turnover. Header : X-Auth-Token:<token>
2	Get details	http://54.164.83.129:8555/ api/account/token-auth	GET	Header : X-Auth-Token:<token>

5.Business Listing*

#	Function	URL	Method	Fields
1	View	http://54.164.83.129:8555/api /business-list	GET	Header : X-Auth-Token:<token>
2	Members	http://54.164.83.129:8555/api /member-list/<trade_license_ number>	GET	Header : X-Auth-Token:<token>

6.Connections

#	Function	URL	Method	Fields
1	send invite	http://54.164.83.129:8555/api/ connection/invite	POST	Postdata: recipient_id Header : X-Auth-Token:<token>
2	open Invitation list	http://54.164.83.129:8555/api/ connection/invitations	GET	Header : X-Auth-Token:<token>
3	Accept	http://54.164.83.129:8555/api/ connection/accept	POST	Postdata: invitation_id Header : X-Auth-Token:<token>
4	my connection s	http://54.164.83.129:8555/api/ connection/my-connections	GET	Header : X-Auth-Token:<token>
5	Public list	http://54.164.83.129:8555/api/ connection/list/<id of target user>	GET	Header : X-Auth-Token:<token>

#	Function	URL	Method	Fields
6	Delete	http://54.164.83.129:8555/api/connection/delete	POST	Postdata: connection_id Header : X-Auth-Token:<token>

7.Notifications

#	Function	URL	Method	Fields
1	Notification list	http://54.164.83.129:8555/api/notifications/list	POST	Postdata: page Header : X-Auth-Token:<token>
2	Mark Read	http://54.164.83.129:8555/api/notifications/list	POST	notification_ids(array), read (bool) eg:- notification_ids[0] = <id of notification> notification_ids[1] = <id of notification> notification_ids[2] = <id of notification> .... Header : X-Auth-Token:<token>

8.News and Events

#	Function	URL	Method	Fields
1	News	http://54.164.83.129:8555/api/news	GET	Null
2	Events	http://54.164.83.129:8555/api/events	GET	Null

9.Bookmarks

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/bookmarks/add	POST	Postdata: title ,item_id, item_id_type, item_parameter, item_parm_type Header : X-Auth-Token:<token>
2	List	http://54.164.83.129:8555/api/bookmarks/list	POST	Postdata: page_no Header : X-Auth-Token:<token>
3	Show	http://54.164.83.129:8555/api/bookmarks/show/<bookmark_id>	GET	Header : X-Auth-Token:<token>

| 4 | Delete | http://54.164.83.129:8555/api/bookmarks/delete | POST | Postdata: bookmark_ids(array)

bookmark_ids[0] = <id of bookmark>
bookmark_ids[1] = <id of bookmark>
bookmark_ids[2] = <id of bookmark>
....
....
Header : X-Auth-Token:<token> |

10.User

#	Function	URL	Method	Fields
1	Show	http://54.164.83.129:8555/api/profile/show/<user_id >	GET	Header : X-Auth-Token:<token>

11.Calendar

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/calender/add	POST	Postdata: date ,item_id,item_id_type, item_parameter, item_parm_type eg: date = <dd-mm-yyyy hh:mm> format Header : X-Auth-Token:<token>
2	List	http://54.164.83.129:8555/api/calender/list	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>
3	Show	http://54.164.83.129:8555/api/calender/show/<calender_id>	GET	Header : X-Auth-Token:<token>
4	Delete	http://54.164.83.129:8555/api/calender/delete	POST	Postdata: calender_ids(array) calender_ids[0] = <id of Calender> calender_ids[1] = <id of Calender> .... Header : X-Auth-Token:<token>

12.Endorsement

#	Function	URL	Method	Fields

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/endorsement/add	POST	Postdata: user_id (<integer>of target user), optional_msg (text) Header : X-Auth-Token:<token>
2	My Endorsements	http://54.164.83.129:8555/api/endorsement/my_endorsements	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>
3	public list view	http://54.164.83.129:8555/api/endorsement/show_endorsements/<id of target user>	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>
4	Show	http://54.164.83.129:8555/api/endorsement/show/<id of endorsement>	GET	Header : X-Auth-Token:<token>
5	Delete	http://54.164.83.129:8555/api/endorsement/delete	POST	Postdata: endorsement_ids(array) endorsement_ids[0] = <id of Endorsement> endorsement_ids[1] = <id of Endorsement> .... Header : X-Auth-Token:<token>

13.Meeting

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/meeting/add	POST	Postdata: to_user_id (user id of recipient) optional fields : timing,timing_two, timing_three, optional_msg <dd-mm-yyyy hh:mm> Header : X-Auth-Token:<token>
2	Accept	http://54.164.83.129:8555/api/meeting/accept	POST	Postdata: meeting_id, accepted_timing_no Header : X-Auth-Token:<token>
3	Confirmed meetings	http://54.164.83.129:8555/api/meeting/confirmed	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>
4	List requests	http://54.164.83.129:8555/api/meeting/requests	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>

#	Function	URL	Method	Fields
5	Reject	http://54.164.83.129:8555/api/meeting/reject	POST	Postdata: meeting_id Header : X-Auth-Token:<token>
6	Modify(unused)	http://54.164.83.129:8555/api/meeting/return	POST	Postdata: meeting_id optional fields : timing,timing_two, timing_three, Header : X-Auth-Token:<token>

14.Refer

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/refer/add	POST	Postdata: to_user_id (user id of target user)(int), item_type (type of the item referred, for events item_type=event)(string), item_id (id of the item)(int), optional_msg Header : X-Auth-Token:<token>
2	List	http://54.164.83.129:8555/api/refer/list	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>

15.Business categories

#	Function	URL	Method	Fields
1	Set	http://54.164.83.129:8555/api/business-categories/set	POST	Postdata: category_ids(array) Header : X-Auth-Token:<token>
2	List	http://54.164.83.129:8555/api/business-categories/list	GET	Header : X-Auth-Token:<token>
3	Remove	http://54.164.83.129:8555/api/business-categories/delete	POST	Postdata: category_ids (integer array)(get ids from "Business categories -- list"). Header : X-Auth-Token:<token>

15.Job Post

#	Function	URL	Method	Fields
1	Add	http://54.164.83.129:8555/api/job-post/add	POST	Postdata: title(string,max 100), description(string,max 500), due_date(optional, dd-mm-yyyy hh:mm) Header : X-Auth-Token:<token>
2	List	http://54.164.83.129:8555/api/job-post/list	POST	Postdata: page_no(optional,int) Header : X-Auth-Token:<token>
3	Remove	http://54.164.83.129:8555/api/job-post/delete	POST	Postdata: job_post_id Header : X-Auth-Token:<token>
4	My Posts	http://54.164.83.129:8555/api/job-post/my-list	POST	Postdata: page_no(optional,int) Header : X-Auth-Token:<token>
5	Show	http://54.164.83.129:8555/api/job-post/show	POST	Postdata: job_post_id Header : X-Auth-Token:<token>
6	Update	http://54.164.83.129:8555/api/job-post/update	POST	Postdata: title(string,max 100), description(string,max 500), due_date(optional, dd-mm-yyyy hh:mm) Header : X-Auth-Token:<token>

15.Job apply

#	Function	URL	Method	Fields
1	add(apply)	http://54.164.83.129:8555/api/job-application/add	POST	Postdata: job_post_id Header : X-Auth-Token:<token>
2	Inbound list	http://54.164.83.129:8555/api/job-application/inbound-list	POST	Postdata: job_post_id,page_no(optional) Header : X-Auth-Token:<token>
3	outbound list	http://54.164.83.129:8555/api/job-application/outbound-list	POST	Postdata: page_no(optional) Header : X-Auth-Token:<token>
4	Remove	http://54.164.83.129:8555/api/job-application/delete	POST	Postdata: job_application_id Header : X-Auth-Token:<token>
